Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Technical Artist with nearly 11 years of commercial experience in real-time graphics, performance profiling, and custom tool development. M.Sc. Civil Engineering background providing strong applied mathematics, problem-solving, and structural logic. Proven track record of bridging the gap between artists and programmers, writing custom HLSL shaders, and automating workflows using C#, Python, and AI coding assistants. Experienced in delivering optimized, cross-platform experiences across PC, Consoles, Mobile, and VR.

TECHNICAL SKILLS

- Engines & Frameworks: Unity (Built-in, URP, HDRP), Unreal Engine (asset migration & support), Unity Editor Tooling
- AI & Automation Tools: GitHub Copilot, Claude Code, ChatGPT, Gemini (actively used for C# scripting, code verification, debugging, and rapid prototyping)
- 3D & Industrial Tools: Blender, Fusion 360, Revit, AutoCAD, Substance Painter/Designer, Adobe CC
- Shaders & VFX: HLSL, GLSL, Shader Graph, Particle Systems, VFX Graph, Post-Processing, Custom Lighting Systems
- Scripting & Automation: C# (Gameplay & Editor Tools Scripting), Python (basic), Git Version Control, Pipeline Automation
- Optimization & Pipelines: Cross-platform optimization (Mobile, Desktop, VR, Console), LODs, Texture/Memory Budgets, Mesh Decimation
- Content Creation & Video: Technical video production, DaVinci Resolve, UI/UX, Interactive Demos
- Community: Active attendee of official Unity industry events (e.g., Unite Barcelona), staying up to date with the latest Unity engine features, and industry trends

PROFESSIONAL EXPERIENCE

Ten Square Games | Wrocław, Poland

Technical Artist | June 2024 – Present

Projects: Trophy Hunter, Medal Hunter

- Prepared the graphical foundation, shaders, VFX, and internal editor tools for major commercial titles for global release.
- Managed project porting to Unity 6 and oversaw technological consistency and mechanics implementation across updates.
- Co-developed custom lighting and shading systems tailored for real-time mobile performance, maximizing visual quality at low cost.
- Optimized existing assets, integrated new content, and developed Unity C# tools to automate workflows for artists while conducting team training.

Vivid Games | Bydgoszcz, Poland

Senior Technical Artist | October 2023 – June 2024

Projects: Real Boxing 3

- Spearheaded project foundations by transferring assets from Unreal Engine to Unity URP and developing custom shaders for higher visual quality and performance.
- Designed and implemented a real-time character customization system integrated with gameplay, supported by custom C# editor tools for designers.
- Created immersive full-screen post-processing effects and provided technical guidance to 2D/3D artists and animators to streamline workflow transition.

Revulo Games | Kraków, Poland

Technical Artist, Co-Owner & Co-Founder | June 2021 – August 2023

Projects: Minigolf Adventure, House Fighters, Super Box Delivery, Maze Blaze, Cyber Pool, Classic Pool

- Led artistic direction and technical execution across multiple titles published on Nintendo Switch, PlayStation, Xbox, and Steam.
- Served as Product Owner and Game Designer, actively shaping project strategy, 3D/2D asset creation, environment design, and VFX.
- Produced technical promotional materials, video showcases, and runtime optimizations tailored to strict console hardware limits.

Rage Quit Games | Kraków, Poland

Senior 3D Artist, Technical Artist | February 2020 – February 2021

Projects: Evil Lands, Tomorrow

- Delivered high-quality 3D assets, environment art, and level design for large multiplayer mobile RPG titles.
- Improved game performance and visuals through custom materials, HLSL shaders, and Unity optimizations as a Technical Artist.
- Developed real-time VFX integrated with gameplay mechanics via C# scripting and maintained distributed Git version control workflows.

Rage Quit Games | Kraków, Poland

3D Artist, Environment Artist | August 2017 – February 2020

Projects: The Wolf Simulator, The Tiger Simulator

- Designed and built immersive, mobile-optimized level environments while managing hi-poly and low-poly texturing workflows.
- Developed custom shaders and integrated gameplay systems to enhance player immersion in both CO-OP and PVP modes.
- Created real-time VFX for player and enemy abilities, enhancing visual feedback and overall environment polish.

Digital Walk & Anim Design | Kraków, Poland

Unity Developer, 3D Artist, Architectural Visualizer | November 2014 – August 2017

- Developed interactive VR, mobile, and desktop architectural applications using the Unity Built-In rendering engine.
- Pushed engine rendering limits to achieve high visual fidelity and smooth frame rates across mobile and VR hardware.
- Executed end-to-end asset production: CAD ingestion, 3D modeling, texturing, C# interactive scripting, and architectural rendering.

EDUCATION

Tadeusz Kościuszko University of Technology | Kraków, Poland

- *Master of Science (M.Sc.) in Civil Engineering* | 2013 – 2015

  Specialization: Building and Structural Engineering
- *Bachelor of Science (B.Sc.) / Engineer in Civil Engineering* | 2009 – 2013

  Specialization: Metal Structures

LANGUAGES & INTERESTS

- Languages: English (Upper-Intermediate / Advanced B2-C1), Polish (Native)
- Interests: Gravel & gravity cycling, ultramarathons, bikepacking, ski touring
